Backend : Java, Spring Boot, Node.js, Express.js, REST APIs, GraphQL, JWT

Databases : MySQL, MongoDB

Cloud & Tools : AWS (S3), Cloudinary, Swagger, Postman, Git/GitHub

EXPERIENCE

React.js Developer

Abilio IT Solutions

📅 Apr 2024 – Present 📍 Hyderabad, India

- Built and optimized responsive React.js 18 applications, improving page load speed by 30% and ensuring seamless UX.
- Integrated REST APIs using Axios/Fetch with robust error handling, reducing API downtime by 40%.
- Implemented error boundaries and memory leak fixes, increasing app stability by 25%.
- Enhanced UI validation and performance optimization, boosting user engagement and reducing bug reports.
- Collaborated with design teams for pixel-perfect UI, ensuring cross-device compatibility.

Key Projects:

Indian Book House (E-Commerce Platform)

- Developed an e-commerce web app serving 5,000+ monthly users with advanced product filtering, search, and cart functionality.
- Integrated Cloudinary for image hosting, ensuring 99.9% uptime and fast media loading.
- Implemented secure payment integration, boosting checkout conversion rates by 20%.

SEVAKI Web Platform

- Built dynamic pages (Landing, Services, Checkout, Bookings) for a services marketplace handling 2,000+ bookings/month.
- Managed CRM modules for content and dynamic fields, cutting manual admin work by 35%.
- Integrated APIs for payments and professionals, enabling real-time availability updates.

Full Stack Developer

RR SoftSol Pvt. Ltd.

📅 Jul 2022 – Mar 2024 📍 Hyderabad, India

- Developed end-to-end web solutions integrating React.js frontend with Spring Boot & Node.js backends.
- Implemented JWT-based role-based authentication, securing data for 500+ active users.
- Reduced backend response times by 35% by optimizing API integration and database queries.
- Designed reusable React.js components, cutting development time for new modules by 25%.
- Improved load times and cross-browser compatibility, resulting in a 20% increase in user retention.
- Collaborated with UI/UX teams to deliver responsive and scalable applications aligned with client needs.

Key Projects:

Product Ingestion System

- Built vendor-facing UI with multilingual support and bulk upload handling 10,000+ SKUs per batch.
- Reduced onboarding time by 40% using dynamic validation and filtering.

Product Log System

- Designed real-time inventory dashboards monitoring 50K+ transactions annually.
- Enabled role-based access control and error logging, increasing system security by 30%.

E-Commerce Event Platform

- Developed event scheduling and RSVP workflows handling 1,000+ concurrent users.

- Integrated email/SMS notifications, improving attendee engagement by 25%.
- Optimized performance, reducing page load from 2.5s → 1.2s for high-traffic events.
